

Protect exposed wires and cables

Safety Sheath

Safety Sheath is a versatile new product from **Epha, Inc.** that allows technicians to quickly isolate cables and hoses. The slide-over cable covers are made of flexible plastic and attach easily. The multiple sizes allow them to be used in most applications, thus avoiding electrical arcing and fluid contamination. This provides safety and protection for electricians, mechanics, and anyone working with wiring or fuel and hydraulic lines.

Using **Safety Sheath** products allows technicians to quickly and securely isolate cables so they can continue to work without worry or risk. There are an incredible number of uses for our slide-over covers. **Safety Sheath helps you keep working safely and efficiently on any job.**

Industry Versatility

- Electrical AC/DC
- Pneumatic
- Hydraulic
- Fuel Systems

Features/Benefits

- Easy Installation
- Reusable
- Four Sizes
- Loss Prevention

Made in the USA

We've Got You Covered!

Safety Sheath

Extra Large

slips easily over hoses and cable ends

Large

Medium

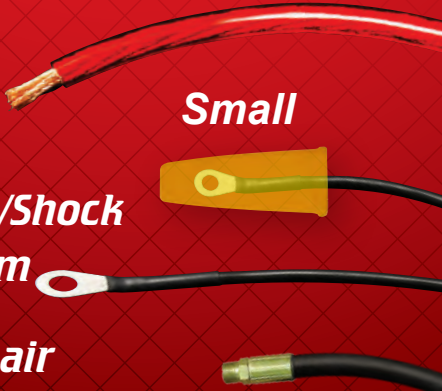

slips on and stays in place

Prevent

- Electrical Ground Out/Shock
- Fluid System Impurities During Repair

Small

We've Got You Covered!

Safety Sheath cable covers are designed to efficiently isolate exposed wires, cables, and hoses from the possibility of electrical shorts and contamination during automotive and electrical repairs. You'll find a wide array of uses for these protective covers. **Safety Sheath** covers come in a variety of sizes.

The concept behind **Safety Sheath** is simple: to protect vulnerable electrical and fluid system lines during the repair process—and more importantly, to protect yourself from them! Use **Safety Sheath** to keep battery terminals, cable ends and hoses hidden away, eliminating the possibility of electrical arcing, keeping technicians of all industries safe and allowing them to work more efficiently. If you work with electricity, wiring or fuel lines in any capacity, you'll find many everyday uses for our products. We proudly manufacture in the U.S.A.

Installs easily over any wire, hose, or cable end.
